* The Camera Interface software is not compatible with macOS 10.15 Catalina and higher. Please contact MacPractice if you have any questions about compatibility of Intra Oral cameras.				
Fujitsu ScanSnap				
Fujitsu announced that it would not be releasing Catalina drivers for some models of their ScanSnap scanners. Devices with Catalina drivers: iX1500, iX500, iX100, S1300i, S1100i, S1100, SV600.				
If your scanner is not listed, VueScan allows the unsupported ScanSnap devices to work in Catalina.				
Printers				
Please verify that your laser printer is compatible with the version of macOS that you will be printing from. Most laser printers with postscript emulation will print insurance and other forms from MacPractice, and all printers should print word processing documents.
